

Appendix L: MicroStrategy Administrator 6.0 Installation Checklist

Installing MicroStrategy Administrator 6.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
MicroStrategy Agent Users Guide				Download the current installation notes and review	http://download.microstrategy.com
	10			Verify OS; Windows 95, 98, or NT SP4	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the certified ODBC driver for metadata RDBMS	http://support.microstrategy.com
				Installing Software	
	12			Install 16-bit ODBC Administrator	
				Install ODBC drivers and required RDBMS client files	
				Create data warehouse and metadata DSN	Must be a system DSN
	12			Install 16-bit MicroStrategy Controls v. 6.0	
	13			Install Agent with Install wizard	
				Copy Files	
				Completing and Checking	
				Test ODBC connection to data warehouse	TestODBC.exe is installed automatically
				Test ODBC connection to metadata repository	TestODBC.exe is installed automatically
				Start application with demo project to verify connection to Intelligence Server	
				Post Installation Steps	
				None	

Appendix M: MicroStrategy Agent 6.0 Installation Checklist

Installing MicroStrategy Agent 6.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
MicroStrategy Agent Users Guide	10			Download the current installation notes and review	http://download.microstrategy.com
				Verify OS; Windows 95, 98, or NT SP4	
				Determine the location, RDBMS, and version of data warehouse database.	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the certified ODBC driver for data warehouse RDBMS	http://support.microstrategy.com
				Determine the certified ODBC driver for metadata RDBMS	http://support.microstrategy.com
				Copy .dss file into Windows (or Winnt) directory	
				Verify the MicroStrategy Intelligence Server 6.0 is installed	
				Edit .dss file to point to Intelligence Server 6.0	If Intelligence Server is in use.
				Installing Software	
	12			Install 16-bit ODBC Administrator	
				Install ODBC drivers and required RDBMS client files	
				Create data warehouse and metadata DSN	Must be a system DSN
	12			Install 16-bit MicroStrategy Controls v. 6.0	
	13			Install Agent with Install wizard	
				Copy Files	
				Completing and Checking	
				Test ODBC connection to data warehouse	TestODBC.exe is installed automatically
				Test ODBC connection to metadata repository	TestODBC.exe is installed automatically
				Start application with demo project to verify installation	
				Post Installation Steps	
				None	

Appendix N: MicroStrategy Architect 6.0 Installation Checklist

Installing MicroStrategy Architect 6.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
Installation and Configuration Guide	7			Download the current installation notes and review	http://download.microstrategy.com
				Verify OS; Windows 95, 98, or NT SP4	
				Determine the location, RDBMS, and version of data warehouse database.	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the certified ODBC driver for data warehouse RDBMS	http://support.microstrategy.com
				Determine the certified ODBC driver for metadata RDBMS	http://support.microstrategy.com
				Installing Software	
	15			Install 16-bit ODBC Administrator	
				Install ODBC drivers and required RDBMS client files	
				Create data warehouse and metadata DSN	Must be a system DSN
				Install 16-bit MicroStrategy Controls v. 6.0	
				Install Architect with install wizard	
				Copy Files	
				Completing and Checking	
				Test ODBC connection to data warehouse	TestODBC32.exe is installed automatically
				Test ODBC connection to metadata repository	TestODBC32.exe is installed automatically
				Post Installation Steps	
				None	

Appendix O: MicroStrategy Broadcaster 6.5 Installation Checklist

Installing MicroStrategy Broadcaster 6.5					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
MicroStrategy Broadcaster Administrator Guide				Download the current installation notes and review	http://download.microstrategy.com
	39			Verify version of Windows NT and service pack installed	install at least NT 4.0 SP4.
	39			Verify that NT login has administrative privileges on NT machine	
	39			Verify that MS IE 5.01 is installed	Install from www.microsoft.com or with product
				Determine the location, RDBMS, and version of data warehouse database.	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the location for the Broadcaster Repository location	Requires a minimum of 1 GB of disk space
				Determine e-mail method to be used	Either MAPI or SMTP
				Verify the availability of MicroStrategy Intelligence Server 6.x	
				Verify the installation and usability of MS Excel 97 SR2 or MS Excel 2000	Required for workbook report functionality
				Verify network protocol is TCP/IP	
				Installing Software	
				Install ODBC drivers and required RDBMS client files	Per instructions from vendor of ODBC drivers
				Create data warehouse and metadata DSN	Must be a system DSN
				Copy project .dss files	
				Install Repository RDBMS - MS SQL Server	SQL Server is bundled with product
	48			Install MicroStrategy Broadcaster with install Wizard	
readme file				Setup Broadcaster Graphing Services	
readme file				If required, setup WAP services	Not required at this time
				Copy files	
				Completing and Checking	
	91			Connect to Repository	Connect to SQL Server;
				Setup Repository tables	Repository tables will automatically be created when first connection to repository is made
	95			Connect to project .dss file	
	108			Setup InfoCenter URL	
	99			Connect to e-mail system	
				Post Installation Steps	
				Setup project	If a project is available; connect to warehouse and metadata to verify install

Appendix P: MicroStrategy Desktop 7.0 Installation Checklist

Installing MicroStrategy Desktop 7.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
Installation and Configuration Guide				Download the current installation notes and review	http://download.microstrategy.com
	7			Verify OS; Windows 95, 98, or NT SP4	
				Verify that IE is installed	product install will upgrade if necessary
				Determine which products to install	Agent, Administrator, Architect or All
				Verify the MicroStrategy Intelligence Server 7.0 is installed	
				Determine IP address for MicroStrategy Intelligence Server	
				Installing Software	
	15			Install MicroStrategy Desktop with install Wizard	
				Select Typical Setup	
				Copy Files	
				Completing and Checking	
	22			Review Install.log file	Located at c:\Program Files\Common Files\MicroStrategy
				Connect to MicroStrategy Intelligence Server	
				Post Installation Steps	
				None	

Appendix Q: MicroStrategy InfoCenter 6.5 Installation Checklist

Installing MicroStrategy InfoCenter 6.5					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
InfoCenter Administrator Guide	12			Download the current installation notes and review	http://download.microstrategy.com
	12			Verify version of Windows NT and service pack installed	install at least NT 4.0 SP4.
	12			Verify that NT login has administrative privileges on NT machine	
	12			Verify that NT Option Pack 4.0 installed with IIS, MTS, and ASP	From the NT Option Pack 4.0
	12			Verify that MS IE 5.01 is installed	Install from www.microsoft.com
				Determine the location, RDBMS, and version of data warehouse database.	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the location, RDBMS, and version of the Broadcaster Repository	
				Determine the certified ODBC driver for data warehouse RDBMS	http://support.microstrategy.com
				Determine the certified ODBC driver for metadata RDBMS	http://support.microstrategy.com
				Determine the certified ODBC driver for broadcaster repository RDBMS	http://support.microstrategy.com
				Verify network protocol is TCP/IP	
				Installing Software	
	14			Install ODBC drivers and required RDBMS client files	Per instructions from vendor of ODBC drivers
				Create data warehouse and metadata DSN	Must be a system DSN
				Install MicroStrategy InfoCenter with install Wizard	
				Install ADO 2.1	
				Copy Files	
				Setup Virtual directory for Web	
				Completing and Checking Installation	
Readme file				Configure for application run without user logged in.	InfoCenter readme.htm file
				Post Installation Steps	
				None	

Appendix R: MicroStrategy Intelligence Server 6.0 Installation Checklist

Installing MicroStrategy Intelligence Server 6.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
MicroStrategy Intelligence Server Users Guide	13			Download the current installation notes and review	http://download.microstrategy.com
				Verify version of Windows NT and service pack installed	install at least NT 4.0 SP4.
				Verify that NT login has administrative privileges on NT machine	
				Determine the location, RDBMS, and version of data warehouse database.	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the certified ODBC driver for data warehouse RDBMS	http://support.microstrategy.com
				Determine the certified ODBC driver for metadata RDBMS	http://support.microstrategy.com
				Verify network protocol is TCP/IP	
				Installing Software	
				Install ODBC drivers and required RDBMS client files	Per instructions from vendor of ODBC drivers
				Create data warehouse and metadata DSN	Must be a system DSN
	19			Install 32-bit MicroStrategy Controls v. 6.0	
				Install MicroStrategy Intelligence Server with install Wizard	
				Select products to install (Server and Server Administrator only)	
				Copy Files	
				Setup Intelligence Server Service account login (with NT admin. Privileges)	
				Completing and Checking Installation	
				Test ODBC connection to data warehouse	TestODBC32.exe is installed automatically
				Test ODBC connection to metadata repository	TestODBC32.exe is installed automatically
				Post Installation Steps	
				Verify Application is setup to start automatically as a service	In NT Control Panel
				Insert Intelligence Server name into project .dss files	

Appendix S: MicroStrategy Intelligence Server 7.0 Installation Checklist

Installing MicroStrategy Intelligence Server 7.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
				Download the current installation notes and review	http://download.microstrategy.com
Installation and Configuration Manual	7			Verify version of Windows NT and service pack installed	install at least NT 4.0 SP4.
				Verify that NT login has administrative privileges on NT machine	
				Verify that MS IE 5.0 is installed	Install from www.microsoft.com
				Determine the location, RDBMS, and version of data warehouse database.	
				Determine the location, RDBMS, and version of the metadata database	
				Determine the certified ODBC driver for data warehouse RDBMS	http://support.microstrategy.com
				Determine the certified ODBC driver for metadata RDBMS	http://support.microstrategy.com
				Verify network protocol is TCP/IP	
				Installing Software	
				Install ODBC drivers and required RDBMS client files	Per instructions from vendor of ODBC drivers
				Create data warehouse and metadata DSN	Must be a system DSN
Installation and Configuration Manual	15			Install MicroStrategy Intelligence Server with install Wizard	
	17			Select Typical Setup	
				Copy Files	
				Setup Intelligence Server Service account login (with NT admin. Privileges)	
				Completing and Checking Installation	
	22			Review Install.log file	Located at c:\Program Files\Common Files\MicroStrategy
				Connect to data warehouse	
				Test ODBC connection to data warehouse	TestODBC32.exe is installed automatically
				Test ODBC connection to metadata repository	TestODBC32.exe is installed automatically
				Post Installation Steps	
				Verify Application is setup to start automatically as a service	In NT Control Panel

Appendix T: MicroStrategy Web 7.0 Installation Checklist

Installing MicroStrategy Web 7.0					
Manual	Pg No	CD	Status	Sections and Sub-Sections	Comments
				Preparation for Install	
				Download the current installation notes and review	http://download.microstrategy.com
				Verify version of Windows NT and service pack installed	install at least NT 4.0 SP4.
				Verify that NT login has administrative privileges on NT machine	
				Verify that IIS 4.0 is installed	From the NT Option Pack 4.0
				Verify that MS IE 5.0 is installed	Install from www.microsoft.com
				Verify the availability of MicroStrategy Intelligence Server	
				Verify network protocol is TCP/IP	
				Installing Software	
Installation and Configuration Manual	15			Install MicroStrategy Web with install Wizard	
	17			Select Typical Setup	
				Copy Files	
	20			Setup Virtual directory for Web	
				Completing and Checking Installation	
	22			Review Install.log file	Located at c:\Program Files\Common Files\MicroStrategy
				Verify access to virtual directory	
				Post Installation Steps	
				None
